

SPORT MEDICINE BRACES

Available sizes:
S, M, L, XL

Available colors: Tan, Black

754 - SHOULDER SUPPORT

The LP Support shoulder support is a functional shoulder support that provides optimal stability without hindering mobility. This makes the shoulder brace also very suitable for that extra support during sports or during work.

The LP Support shoulder brace provides warmth to the shoulder joint, protects your shoulder from re-injury and functions optimally in cases of overload, osteoarthritis/wear and swelling.

In addition, the shoulder brace is equipped with a Velcro fastener which ensures, among other things, optimal fit and wearing comfort.

Available sizes:
S, M, L, XL

Available color: White

901 - CLAVICAL BRACE

The LP Clavic Brace promotes healthy posture and is an excellent aid in correcting poor posture and shoulder slump. It provides a constant reminder to sit, stand and walk with back straight and the shoulders back.

The brace is ideal for post clavicle fracture, as it immobilises clavicles to aid healing. It allows normal movement without cutting or binding, and the hook and loop closure allows the brace to be put on and removed without assistance.

Available sizes:
S, M, L, XL

Available colors: Tan, White

906 - CERVICAL COLLAR

The LP Cervical Collar helps relieve pain associated with neck strains and sprains.

It is made of 17mm medium density foam covered in cotton jersey, with a contoured cut for the chin. A hook-and-loop closure at the back is included for easy adjustment.

The LP cervical collar largely prevents flexion and extension of the cervical spine and can also be used at night for postural correction. The collar also provides therapeutic support after a neck injury and can help shorten recovery times.

Available sizes:
XS, S, M, L, XL, XXL
Available color: Tan

902 - SACROLUMBAR SUPPORT

The Sacrolumbar LP support is a back support system, equipped with 4 flexible, retractable and adjustable rods, which attaches comfortably and provides the lumbar support necessary to relieve and prevent pain.

It helps prevent back pain while providing spinal support and relieves muscle discomfort.

Made from breathable elastic foam, it also helps relieve lower back pain caused by sacroiliac strains. Equipped with six foldable ribs and a hook-and-loop fastener to adjust the width of the support to the desired tension.

Available sizes:
XS, S, M, L, XL, XXL
Available color: Tan

903 - SACROLUMBAR SUPPORT

LP Sacro lumbar support is made of elastic and breathable foam material. The girdle is devised in a way to provide a comfortable support to the back. Pliable support splints are on the back of the support for extra stability.

The width of the support is adjusted with the hook and loop closure for desired tension.

Helps prevent sprains of supporting ligaments.

Available sizes:
S, M, L, XL, XXL
Available color: Black

912 - INDUSTRIAL BACK SUPPORT

The LP Industrial Back Support includes flexible stays which help to relieve pressure and stress on the lower back associated with frequent heavy lifting in the workplace.

The support also features 4" side pulls for even compression and support, as well as criss-cross shoulder straps, adjustable suspenders and Velcro closure for a comfortable fit.

The LP Industrial Back Support can be used for both lumbar and lumbosacral regions of the spine, and the adjustable design fits most body sizes.

Available sizes:

S, M, L

Available colors: White

605 - ELASTICATED PALM BRACE

The LP Elasticated Palm Brace provides support and relieves pain from stiff, swollen or injured wrist.

The unique design provides firm support for the maintenance of joint structures with gentle compression over the palm affording the right kind of protection for injured, weak or unstable palm conditions. This provides effective support to damaged ligaments or muscles.

LP Palm Brace is designed to conform naturally to the contours of the palm and will not slip or ride up.

It is available in left (L) and right (R) formats.

Available sizes:

XS, S, M, L, XL

Available color: Tan

725 - WRIST SPLINT

The LP Wrist Splint provides support for weak or stiff wrists, and aids in the treatment of carpal tunnel syndrome.

The splint includes a spoon stay which can be removed as the healing process progresses, and provides comfortable compression for a weak or overstressed wrist.

The LP Wrist Splint is made from the highest grade closed cell neoprene, covered with stretch nylon on both sides for comfort. Neoprene is the ultimate material for compression and heat retention, and this support retains body heat to warm the wrist and increase blood circulation.

It is available in left (L) and right (R) formats.

Available sizes:

S, M, L, XL

Available color: Tan

752 - WRIST/THUMB SUPPORT

The Wrist/Thumb Support is recommended in wrist sprain, palm injury, and thumb pain. It is helpful in keeping the thumb in the right position and avoid any further damage to the injury.

It is used to facilitate support and stability to the wrist and is useful for painful, swollen, or weak joints.

Thermal wrist support for tenosynovitis, carpal tunnel syndrome, and general wrist support. Provides maximum comfort, healing warmth and therapeutic support.

602 - ELASTICATED THIGH SUPPORT

The LP Elasticated Thigh Support provides optimal protection for weak or injured thighs, and is an ideal elastic brace for support and compression.

Medically approved and made of quality surgical elastic, it is comfortable to wear and designed to conform with the contours of the thigh so it won't slip or ride up.

Available sizes:

S, M, L

Available color: White

622 - ATHLETIC SUPPORTER

The LP athletic support is a durable and comfortable support designed for the athlete.

It is ideal for use during exercise, training or any sporting activity and provides support and lift to prevent injury.

Available sizes:

S, M, L, XL

Available color: White

705 - THIGH SUPPORT

The LP Thigh Support provides heat retention, compression and support to the quadriceps and hamstring muscles so it is ideal for people recovering from pulled muscles in these areas. It also helps to reduce pain from tendinitis.

The stretch fabric inside ensures comfort during wear and makes the support easy to slip on or off.

Available sizes:

S, M, L, XL

Available color: Tan

Thigh & Calf

718 - SHIN AND CALF GUARD

The LP Shin and Calf Guard provides compression and support to the shin and calf. It is recommended for soft tissue injuries of the lower leg, including shin splints.

It is designed to fit snugly above the ankle, providing warmth and support to the lower shin and achilles area. The stretchy fabric inside ensures comfort while wearing and makes the sleeve easy to put on or take off.

Available sizes:

S, M, L, XL

Available color: Black

Knee

706 - CLOSED PATELLA KNEE SUPPORT

The LP Knee Support Closed Patella provides firm support and uniform compression for weak or overstressed knees. It is made from the highest grade closed cell neoprene, covered with stretch nylon on both sides for comfort.

Neoprene is the ultimate material for compression and heat retention, and this support retains body heat to warm the knee joint and increase blood circulation.

The LP Knee Support Closed Patella is helpful for post-operative knee problem, strains, arthritis and protection against abrasions. It is designed to fit neatly and comfortably under clothing, and is easy to slip on or off.

Available sizes:

S, M, L, XL, XXL

Available color: Black

707 - KNEE SUPPORT WITH PAD

The LP Knee Support with Pad features an additional $\frac{1}{8}$ " oval pad that enhances knee protection and retains body heat. It is made from the highest quality closed cell neoprene, covered with stretch nylon on both sides for greater comfort.

The LP Knee Support with Cushion is useful for post-operative knee problems, strains, arthritis and protection against abrasions. It is designed to fit snugly and comfortably under clothing, and is easy to put on or take off.

Available sizes:

S, M, L, XL

Available color: Black

Available sizes:

XS, S, M, L, XL, XXL

Available colors: Tan, Black

708 - OPEN PATELLA KNEE SUPPORT

The LP Open Patella Knee Support provides compression for weak or overloaded knees and includes an exclusive reinforced patella stabilizer that prevents excessive patella displacement and movement.

It provides compression for weak or overloaded knees, and the additional 1/8" oval pad provides additional padded protection to the joint. The open patella design prevents excessive pressure on the patella.

The LP Open Patella Knee Support helps protect against further injuries and it is also useful for post-operative knee problems, strains, arthritis and protection against abrasions.

Available sizes:

XS, S, M, L, XL, XXL

Available colors: Tan, Black

709 - KNEE STABILIZER WITH BUCKLES

The LP Knee Stabiliser with Buckles enhances knee stability and provides even compression to an injured or recovering knee. It includes two adjustable hook and loop straps which allow adjustment for additional compression when required and ensures stabilization during activities.

The medial and lateral spiral stays provide extra support and stability, and the additional neoprene circle pad around the patella provides added protection and stabilisation to prevent patella displacement.

Available sizes:

XS, S, M, L, XL, XXL, XXXL

Available colors: Tan, Black

710 - HINGED KNEE STABILIZER

The LP Hinged Knee Stabilizer features metal hinges that provide support and stability to the medial and lateral ligaments.

Dual hook-and-loop straps allow adjustment for additional compression if needed and provide stabilization during activities. The additional circular neoprene pad around the patella provides padded protection and stabilization to prevent patella displacement.

This knee stabilizer is part of our extensive range of knee braces and is made from the highest quality closed cell neoprene, covered with stretch nylon on both sides for added comfort.

Available sizes:

XS, S, M, L, XL, XXL

Available colors: Tan, Black

721 - OPEN PATELLA STABILIZER

The LP Patella Stabilizer is recommended for the treatment of knee injuries in which stabilization of the patella is the primary concern. It helps relieve pain from tendonitis and arthritis by improving medial compression to improve knee stability.

The open patella design relieves pressure on the patella and an additional pad provides additional compression and internal J-shaped stabilization. Medial and lateral spiral stays on either side of the knee allow limited flexion with rotational stability, while two neoprene traction straps above and below the patella provide additional support.

It is available in left (L) and right (R) formats.

Available size:

One size

Available colors: Tan, Black

756 - CLOSED PATELLA KNEE SUPPORT

The LP Closed Patella Knee Support provides firm support and uniform compression for weak or overstretched knees.

The unique velcro design fits most knee sizes, and the support provides comfortable compression to relieve pain resulting from strains, sprains, arthritis or tendonitis.

951 - KNEE SUPPORT

The LP Support knee support is for very mild knee problems and is designed to keep the knee warm. Knee pads are made from a ventilated, comfortable and elastic material that provides plenty of warmth and support without being uncomfortable.

The knee brace can therefore be worn comfortably all day, so that the knee brace functions optimally for years with (blood) circulation problems and swelling.

The LP Support knee support helps reduce pain by providing correct pressure distribution and effective support to injured ligaments and muscles.

Available sizes:

S, M, L, XL

Available color: Tan

604 - ELASTIC ANKLE SUPPORT

Medically approved and comfortable to wear, its two-way stitching helps prevent and treat stress injuries and is particularly recommended for ankle sprains or strains.

The LP Elastic Ankle Support is suitable for all sports, sporting activities and everyday use.

Available sizes:

S, M, L, XL

Available color: White

634 - ANKLE WRAP

The LP Ankle Wrap is made from a unique combination of extra-strong elastic and cross-sectional nylon providing durable, hard-wearing support. It supports weak and injured tissues and is suitable for most sports, sporting activities or just everyday use.

The boot loop allows the wrap to be repositioned for easy application, and the LP ankle wrap's adjustable design fits most body sizes. The material is both durable and reusable.

Available size:

One size

Available color: Black

954 - ANKLE SUPPORT

The LP Ankle Support is made from a unique combination of extra-strong elastic and cross-sectional nylon providing durable, hard-wearing support. It supports weak and injured tissues and is suitable for most sports, sporting activities or just everyday use.

The boot loop allows the wrap to be repositioned for easy application, and the LP ankle support's adjustable design fits most body sizes. The material is both durable and reusable.

701 - TENNIS ELBOW SUPPORT

The ankle support provides firm support for the weak ankle. Helps prevent ligament sprains and relieve pain associated with tendonitis.

Available size:

One size

Available color: Tan

751 - TENNIS ELBOW SUPPORT

The LP Tennis Elbow Support is ideal for tennis elbow as it provides comfortable compression for weak or overstressed elbows.

The support ensures maximum heat retention and provides uniform pressure against the muscles and tendons. The adjustable hook and loop strap can apply additional compression when needed.

LP Tennis Elbow Support is made of the highest grade closed cell neoprene which is covered with stretch nylon on both sides for comfort. This makes it easy to slip on or off, and this support retains body heat to warm the muscles and increase blood circulation.
